Objective

Motivated and detail-oriented fresher aspiring to build a career in Software Development and Artificial Intelligence. Passionate about solving real-world problems using programming and machine learning, with hands-on project experience and a strong willingness to learn.

Skills

Python, C, Machine Learning, NLP (Text Preprocessing, Tokenization), NumPy, Pandas, Matplotlib, Scikit-learn, GitHub, Google Colab, VS Code, Data Structures, Algorithms (Basic)

Projects

Resume Screening System: Built a machine learning model to classify resumes using NLP preprocessing techniques.

Semantic Search vs Keyword Search: Developed system using vector embeddings and similarity-based retrieval.

Python AI Basics: Implemented text preprocessing and word frequency analysis in Colab.

Education

United College of Engineering and Research (Expected Graduation: 2029)

Achievements

Completed 60 Days AI Challenge (ABTalks); Built multiple AI projects and shared on GitHub.

Strengths

Quick learner, Problem-solving mindset, Consistent and disciplined

Languages

English, Hindi
