PROFESSIONAL SUMMARY

Aspiring Software Development and AI professional with hands-on experience building machine learning and NLP projects, including resume classification and semantic search systems. Skilled in Python, data preprocessing, and applied machine learning using Scikit-learn, NumPy, and Pandas. Quick learner with a disciplined, problem-solving approach and a track record of independently completing structured AI training programs.

EDUCATION

United College of Engineering and Research

Expected Graduation: 2029

PROJECTS

Resume Screening System

- Built a machine learning model to classify resumes by applying NLP preprocessing techniques such as text cleaning and tokenization.

Semantic Search vs Keyword Search

- Developed a retrieval system comparing semantic and keyword-based search using vector embeddings and similarity-based matching.

Python AI Basics

- Implemented text preprocessing and word frequency analysis using Python in Google Colab.

SKILLS

Python, C, Machine Learning, Natural Language Processing (Text Preprocessing, Tokenization), NumPy, Pandas, Matplotlib, Scikit-learn, Data Structures, Algorithms (Basic), Git/GitHub, Google Colab, VS Code

CERTIFICATIONS & ACHIEVEMENTS

- Completed the 60 Days AI Challenge (ABTalks) — built and published multiple AI projects on GitHub.

LANGUAGES

English, Hindi
